Section 2.3: Parlay Max Payout per Bet

Parlay Max Payout per Bet is used to calculate the maximum amount that Master can allow Agent to set for Member to wager per parlay combo (Single Match Parlay, Combo 2, etc.) in each ticket:

- **Soccer Parlay**: parlay bets that include only soccer events.
- **Mix Sports Parlay**: parlay bets that include sports other than soccer.

Example - given that the Parlay Max Payout per Bet setting is:

- **Combo 2** = 500;

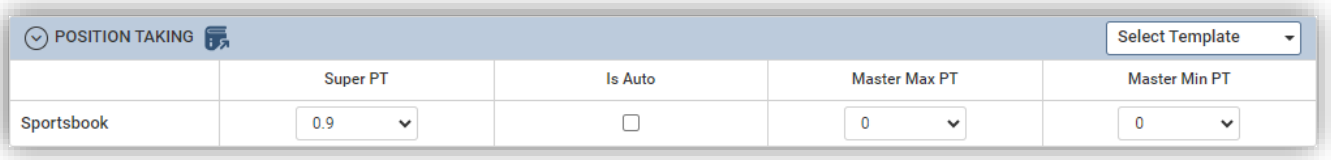

- **Combo 3-5** = 1,000;
- **Combo 6+ & System Parlay** = 2,000

If Member makes 3 selections: A (odds = 2), B (odds = 3), C (odds = 4), the system will offer the following combos: Double (3 Bets), Treble (1 Bet), Trixie (4 Bets), and Lucky 7 (7 Bets)

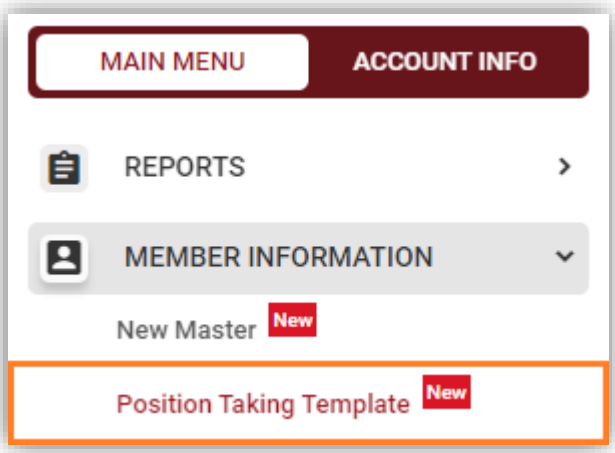

- **Max Bet of 3 Double bets** = Parlay Max Payout per Bet of Combo 2 / (odds AB + odds BC + odds AC) = 500 / (2*3 + 3*4 + 2*4) = 500 / 26 = 19
- **Max Bet of a Treble bet** = Parlay Max Payout per Bet of Combo 3-5 / odds ABC = 1,000 / (2*3*4) = 1000 / 24 = 41
- **Max Bet of Trixie and Lucky 7 bets** = Parlay Max Payout per Bet of Combo 6+ & System Parlay / (odds Double + odds Treble) = 2,000 / (26 + 24) = 2000 / 50 = 40
