AGENCY API

Guideline

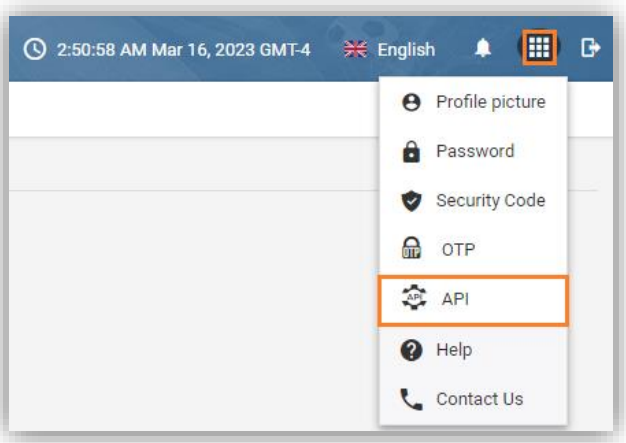

1. Introduction

The Agency API offers a new way to access reports through its API service. By creating customized API keys, you can retrieve reports tailored to your specific needs. All API Keys are managed through the API Key Management function.

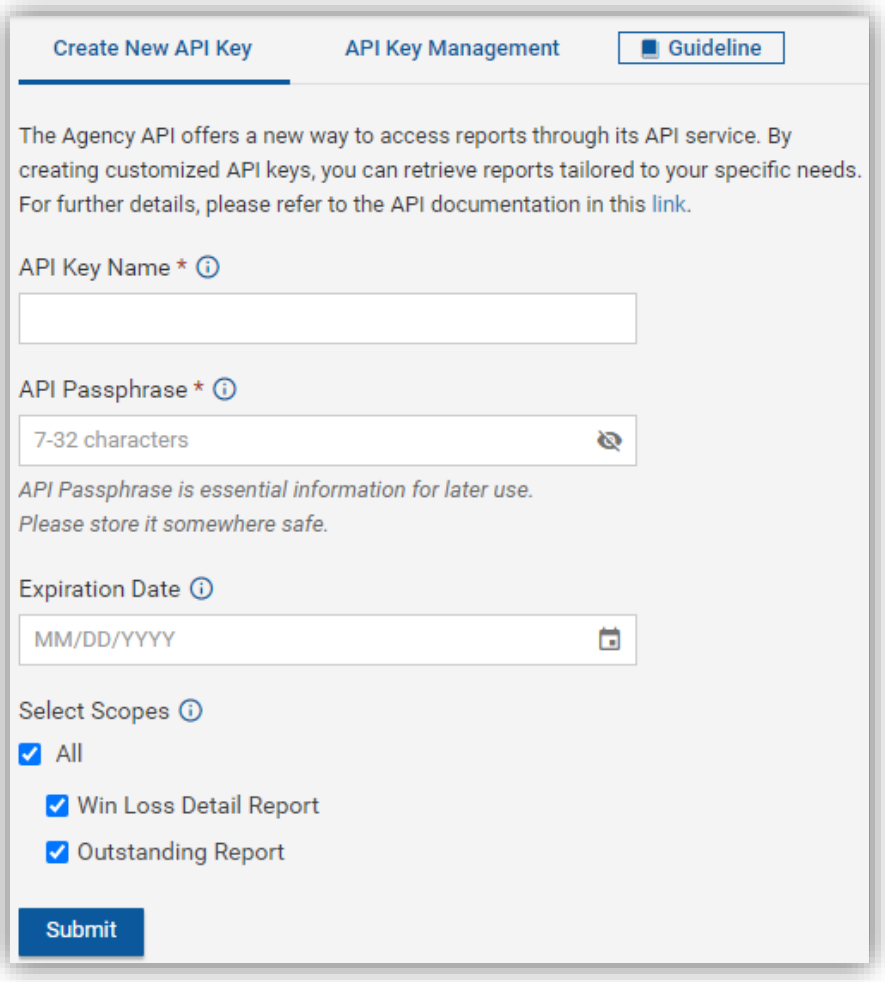

2. Create New API Key

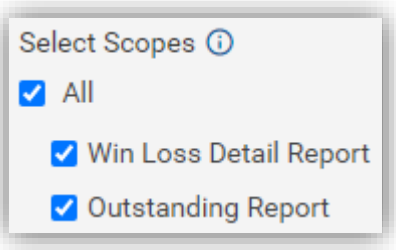

- To create a new API Key, on Header Menu, click **Settings Dropdown** and select **API**:

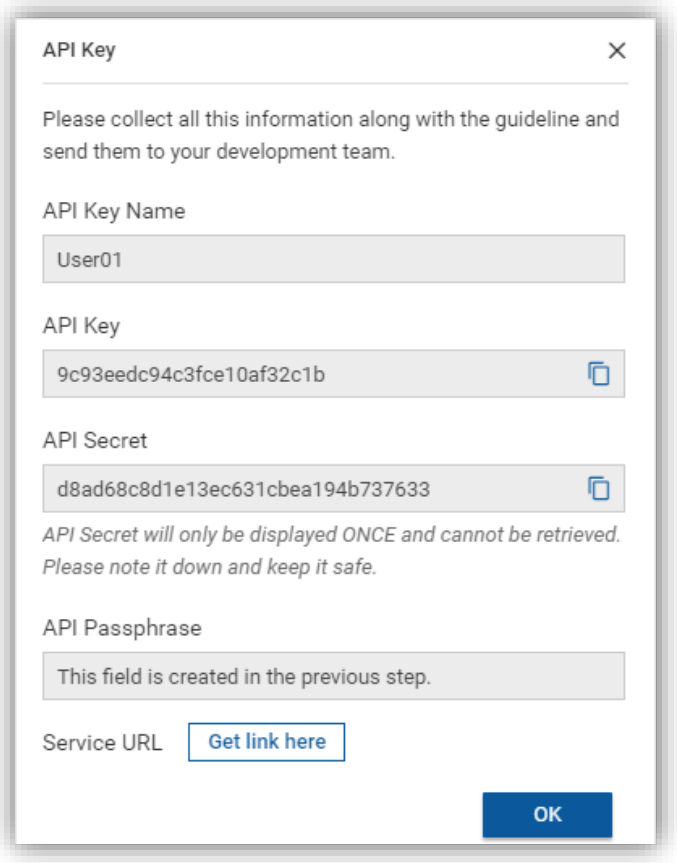

- Fill in the following information:

- **API Key Name:** a unique identifier separates one API Key from another for ease of management.
- **API Passphrase:** same as a password - needs to be stored safely.
- **Expiration Date:** the date when API Key can no longer be used.
- **Scopes**: the permission to access reports (Win/Loss Detail, Outstanding, etc.) granted to the API Key. You can choose which reports the user can view (selecting **All** means allowing the user to view all reports):

- Click **Submit** and you will see the following popup:

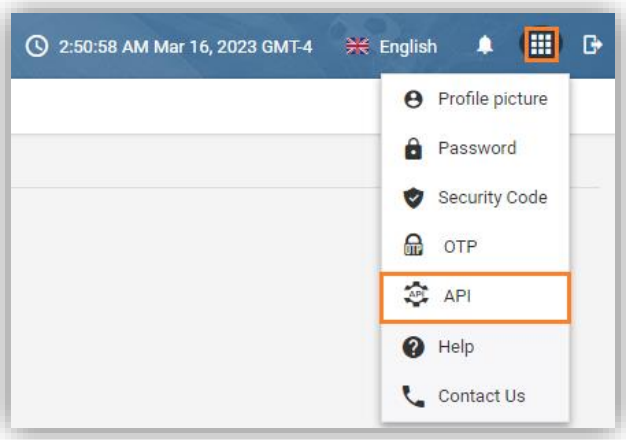

Use the above information as inputs to run your API Key.

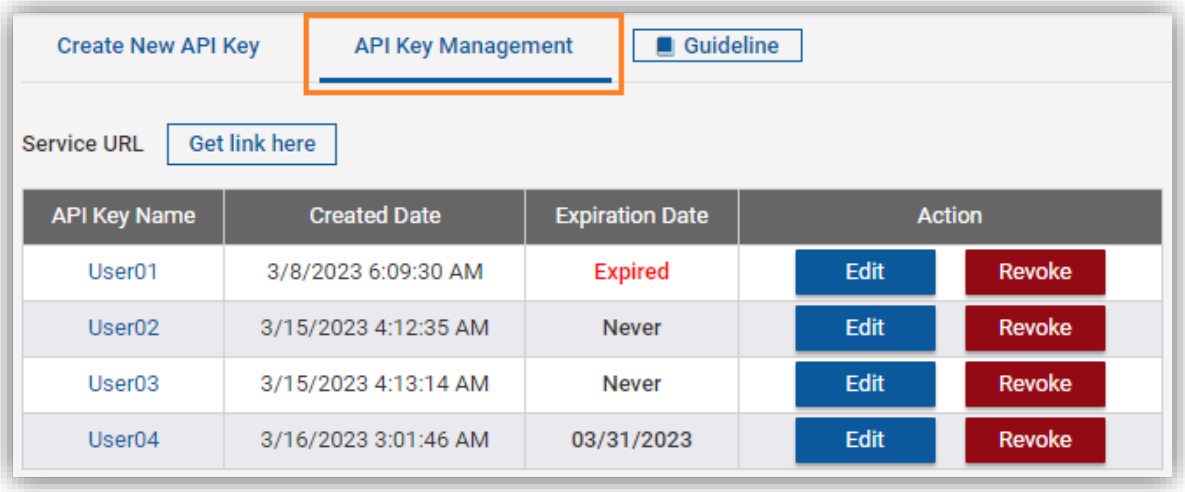

3. API Key Management

API Key Management helps you monitor and maintain API Keys including their scopes, details, expiration, etc.

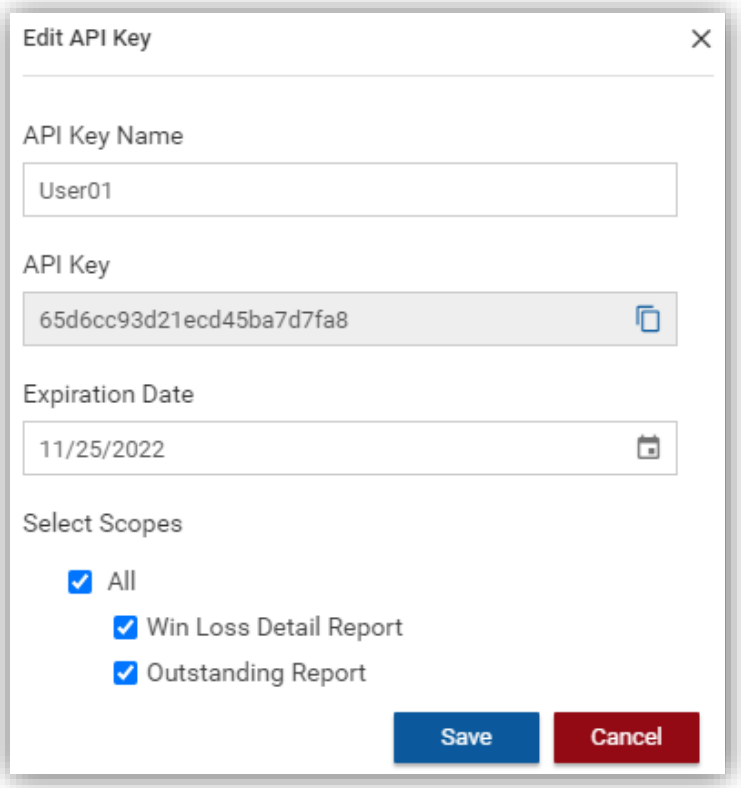

- To access API Key Management, on Header Menu, click **Settings Dropdown** and select **API**:

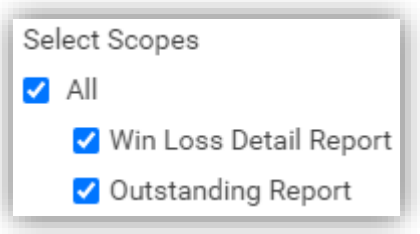

- Click the **API Key Management** tab, and you will see the following screen:

  - **API Key Name**: the name that is given to the API Key by its creator.
  - **Created Date**: the date that the API Key is created.
  - **Expiration Date**: the date when the API can no longer be used.
  - **Edit**: modify the API Key details. You can change the API Key Name, Expiration Date, and Scopes.

- **Scopes** are the permission to access reports (Win/Loss Detail, Outstanding, etc.) granted to the API Key. You can choose which reports the user can view (selecting **All** means allowing the user to view all reports):

– **Revoke**: take back the API Key's access permissions, render it unusable, and remove it from the list.
