MULTIPLE CUSTOMER SETTINGS GUIDELINE

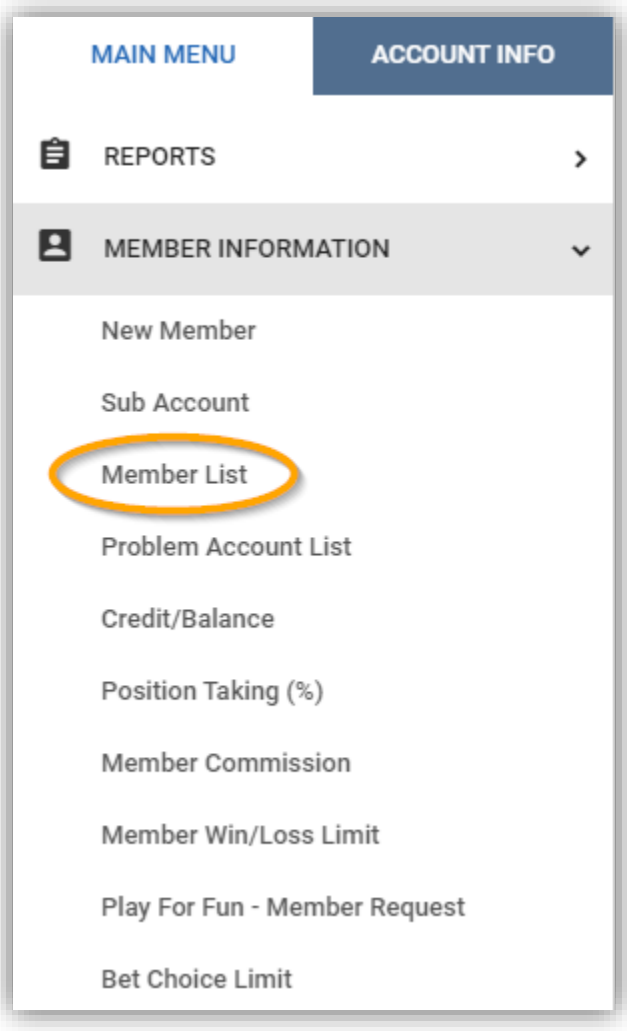

1. Introduction

We are delighted to announce the launch of the new "**Multiple Customer Settings**" function. To create flexibility when updating multiple settings for different accounts, this function allows you to make partial updates on one or some settings instead of updating all settings at once.

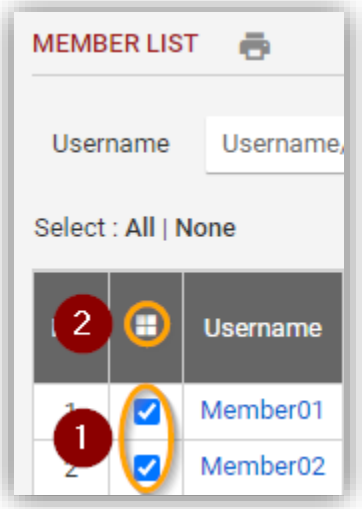

2. Multiple Update Instruction (e.g. Live Casino)

2.1. Position Taking Settings

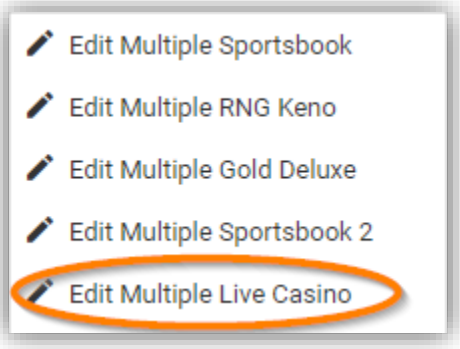

Step 1: Go to **Member Information > Member List**.

Step 2: Select multiple accounts (**1**) and then click the icon (**2**).

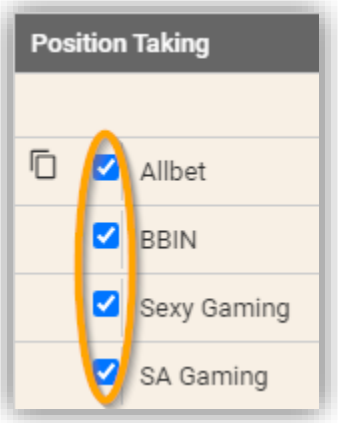

Step 3: Click **Edit Multiple Live Casino.**

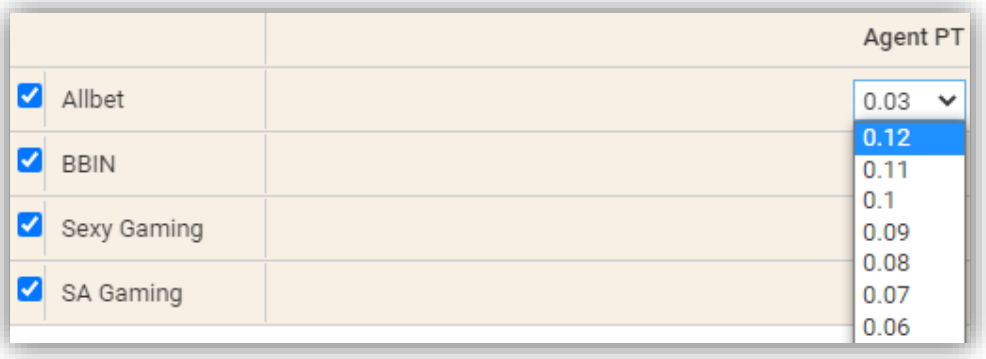

(Note: if it is the first use of the session, you will be asked to enter the security code.)

Step 4: In **Position Taking** section, select the rows you want to update.

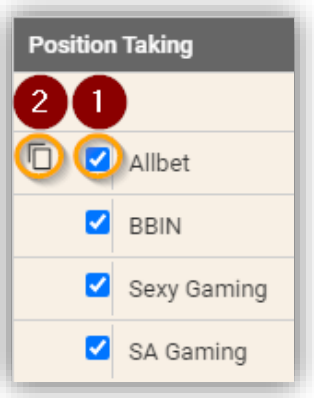

– When selecting these checkboxes, you can update **Agent PT** of the selected rows.

Step 5: From the **Agent PT** drop-down list, select your desired PT values.

– To save time, you can *copy the values* of the first row for the lower rows. *(Note: skip to step 6 if you do not want to copy values.)*

– To copy values, *make sure the first row is selected* (**1**), and click **Enable Copy Mode** (**2**) next to the checkboxes:

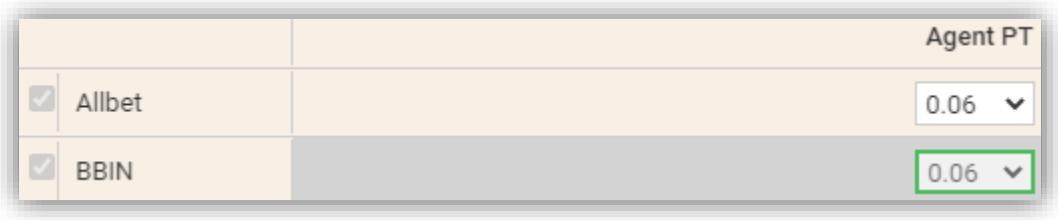

– While the *copy mode is enabled*, the values you selected for the first row will be copied for the lower rows. *(Note: the system will copy the values of the first row for All lower rows, regardless of whether the lower rows are selected or not.)*

– When copying the values, you might see the following result:

– There are 3 case scenarios here:

a) For the Green box, the value is successfully copied from the first row:

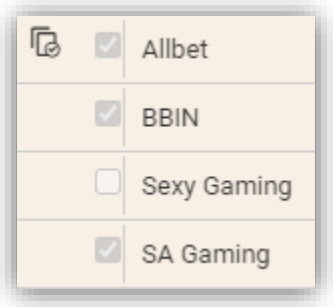

b) For the row with the Red box, the value cannot be copied since the *first row's Agent PT value* (0.06) is outside of the *red box's Agent PT value range* (0-0):

c) For the row with the non-colored box, *the box's Agent PT value* (0.06) is already the same with *that of the first row* (0.06) before enabling **Copy Mode**, the row's checkbox remains selected:

– When the copy mode is enabled, the checkboxes of the rows are *disabled* and/or *unselected* (if the row has a red box):

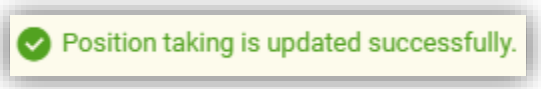

To enable the checkboxes, click **Disable Copy Mode** , and then re-select the rows you want to update.

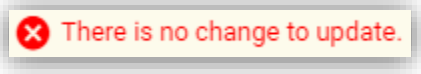

Step 6: On the top right corner of **Position Taking** section, click **Update** .

– When succeeded, you will see the following message:

– If you have not selected any row and click **Update** , you will see the following message:

– *(Note: any row that is selected will be updated whether its checkbox is enabled or not.)*

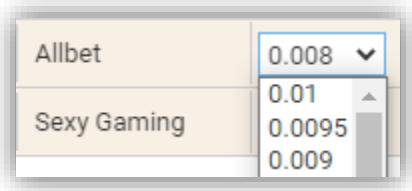

2.2. Commission Settings

Step 1: Repeat *Step 1* through *Step 3* from the instruction of Position Taking Settings.

Step 2: In **Commission** section, select the products you want to update.

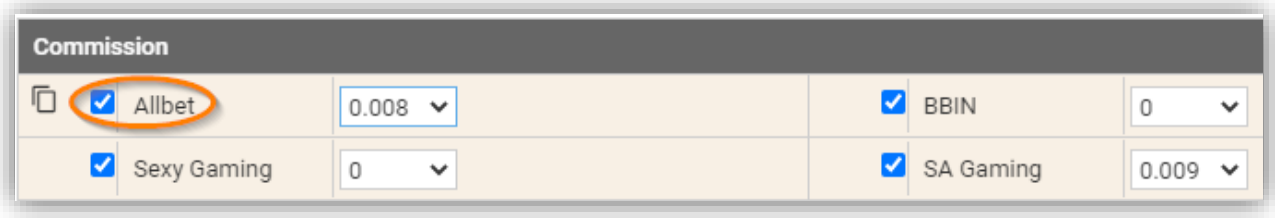

Step 3: From the **Commission** drop-down list, select commission values for each product.

– To save time, you can *copy the values* of the first product (on the top left) for the other products. *(Note: you can skip this step if you do not want to copy values.)*

– Before copying, make sure the first product on the left side is selected:

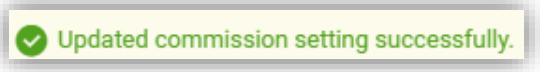

– Refer to *Step 5* from the instruction of Position Taking Settings to copy values.

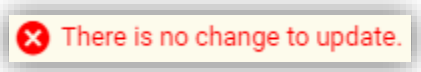

Step 4: On the top right corner of **Commission** section, click **Update** .

– When succeeded, you will see the following message:

– If you have not selected any product and click **Update** , you will see the following message:

(Note: any product that is selected will be updated regardless of whether its checkbox is enabled or not.)
