MULTIPLE CUSTOMER SETTINGS GUIDELINE

1. Introduction

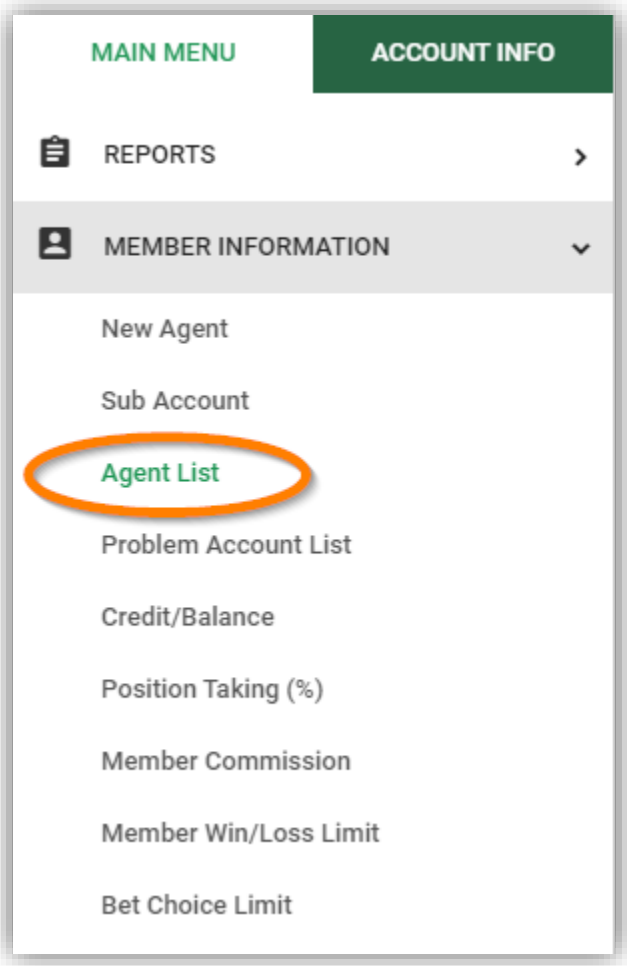

We are delighted to announce the launch of the new "**Multiple Customer Settings**" function. To create flexibility when updating multiple settings for different accounts, this function allows you to make partial updates on one or some products instead of updating all products at once.

2. Multiple Update Instructions (e.g. Live Casino)

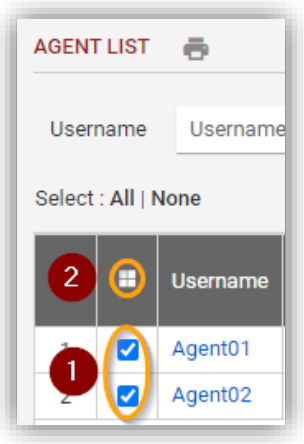

2.1. Position Taking Settings

This section provides you with a general instruction on how to perform partial updates on Position Taking Settings.

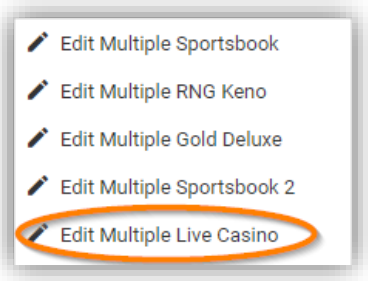

Step 1: Go to **Member Information** > **Agent List**.

Step 2: Select multiple accounts **(1)** and then click the icon **(2)**.

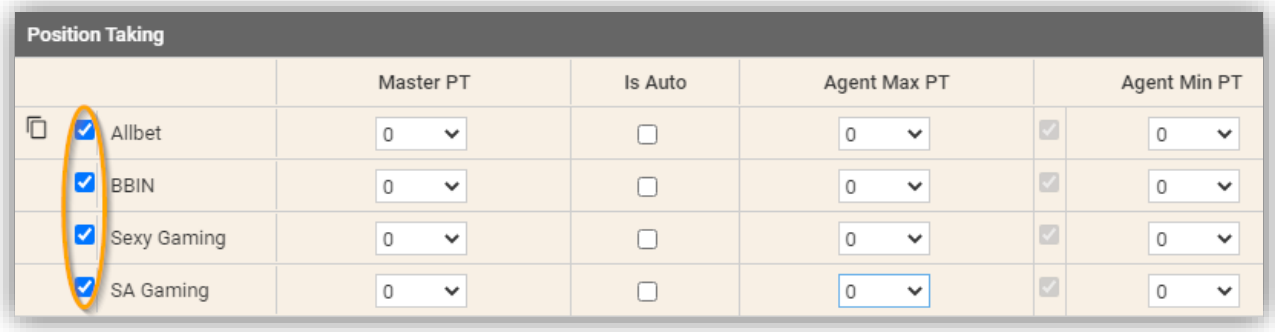

Step 3: Click **Edit Multiple Live Casino.**

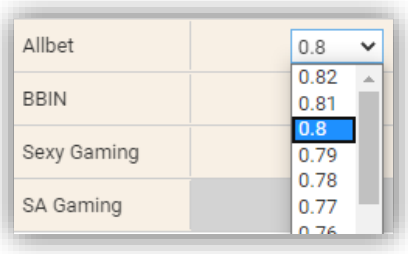

(Note: if it is the first use of the session, you will be asked to enter the security code.)

Step 4: In **Position Taking** section, select the rows you want to update.

– When selecting these checkboxes, you can update **Master PT**, **Agent Max PT**, and **Agent Min PT** of the selected rows. *(Note: the checkboxes of **Agent Min PT** are now disabled as you have selected the checkboxes on the left side.)*

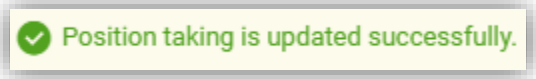

Step 5: From the **(Min/Max) PT** drop-down list, select your desired PT values.

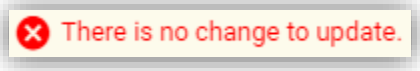

Step 6: On the top right corner of **Position Taking** section, click **Update** to save your changes.

– When succeeded, you will see the following message:

– If you have not selected any row and click **Update**, you will see the following message:

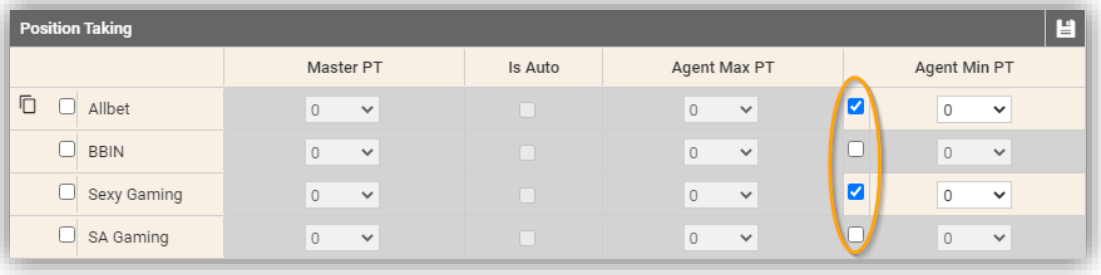

(Note: any row that is selected will be updated whether its checkbox is enabled or not.)

2.2. Position Taking Settings (Min PT Only)

Instead of updating **PT** and **Min/Max PT** all at once, you can choose to update ONLY **Min PT**. This section provides you with the instruction on how to do it.

Step 1: Repeat *Step 1* through *Step 3* from the instruction of Position Taking Settings

Step 2: From **Agent Min PT** on **Position Taking** section, select Agent Min PT of the products and your desired *Min PT values* to update:

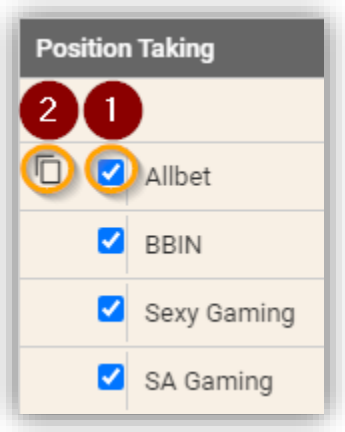

Step 3: Repeat *Step 6* from the instruction of Position Taking Settings to save your changes.

2.3. Position Taking Settings (Copy Mode)

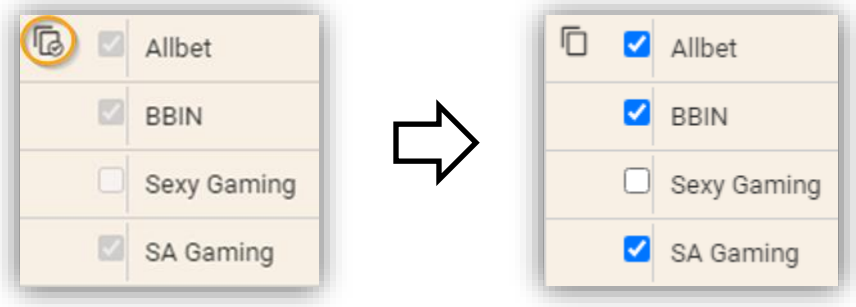

To save time, you can copy PT values from the first row to the lower rows using **Copy Mode**. This section provides you with the instruction on how to do it.

Step 1: Repeat *Step 1* through *Step 5* from the instruction of Position Taking Settings

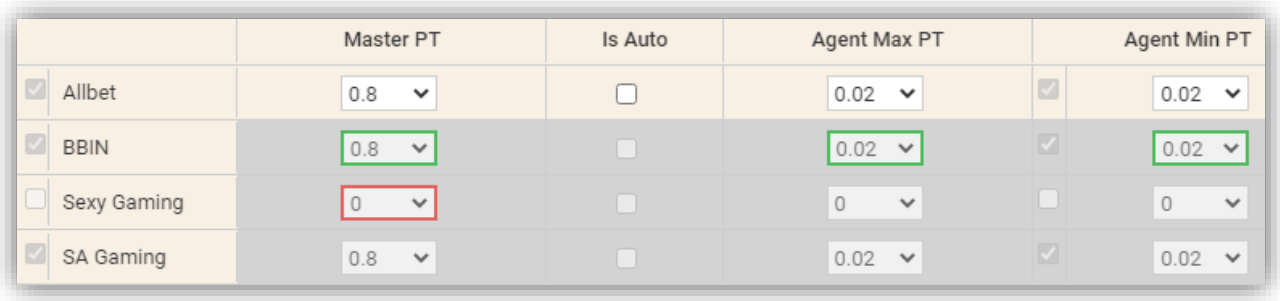

Step 2: Make sure the first row is selected (**1**), and click **Enable Copy Mode** (**2**) next to the checkboxes:

- While the *copy mode is enabled*, the values you selected for the first row will be copied for the lower rows.
- A few notes when using **Copy Mode**:
  - The system will copy the values of the first row for All lower rows, regardless of whether the lower rows are selected or not.
  - After enabling **Copy Mode**, all the rows will be disabled. To enable these rows, click **Disable Copy Mode** :

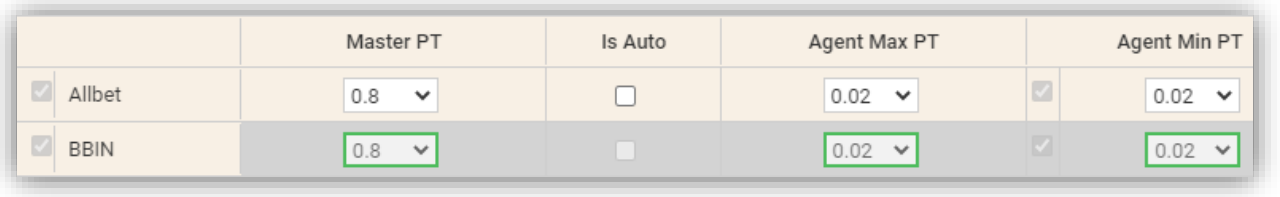

When copying the values, you might see the following result:

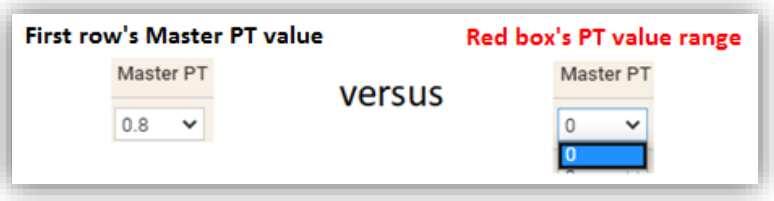

– There are 3 case scenarios here:

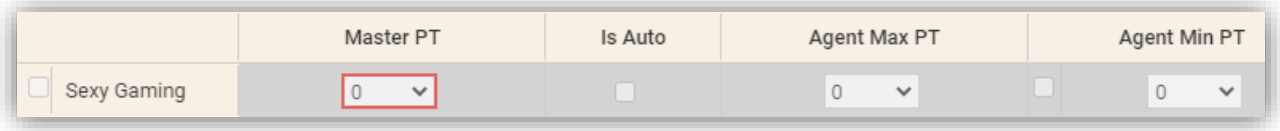

a) For the Green boxes, the first row's values are successfully copied to those green boxes:

b) For the row with the Red box, the value cannot be copied since the *first row's Master PT value* (0.8) is outside of the *red box's Master PT value range* (0-0):

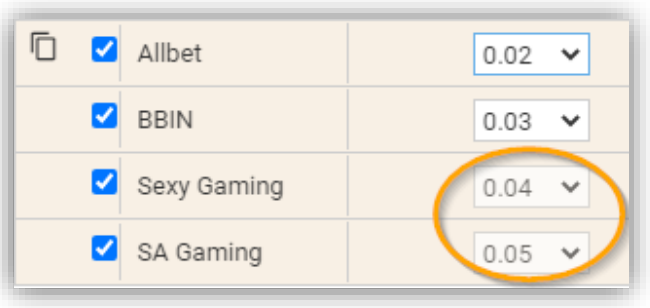

➢ The order of copying is from left to right, as the far left box (red box) cannot be copied, the two remaining non-colored boxes are also left uncopied:

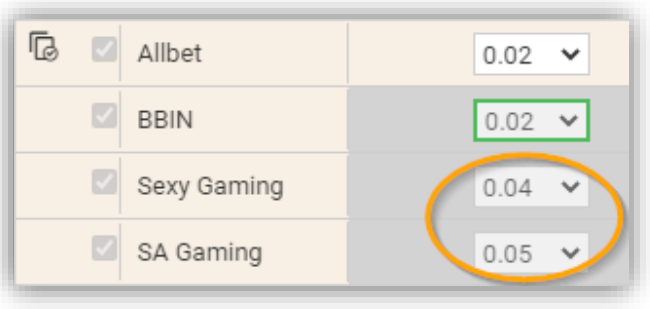

c) For the row without any colored boxes, the row's *PT values* (0.8, 0.02, 0.02) are already the same with *those of the first row* (0.8, 0.02, 0.02) before enabling **Copy Mode**, the row's checkbox remains selected. *(Note: any selected row will be updated whether its checkbox is enabled or not)*:

– ***Exception: when the PT boxes are already disabled beforehand:***

In this case, when **Copy Mode** is enabled, *the disabled boxes will remain uncopied* and *their checkboxes will remain selected*:

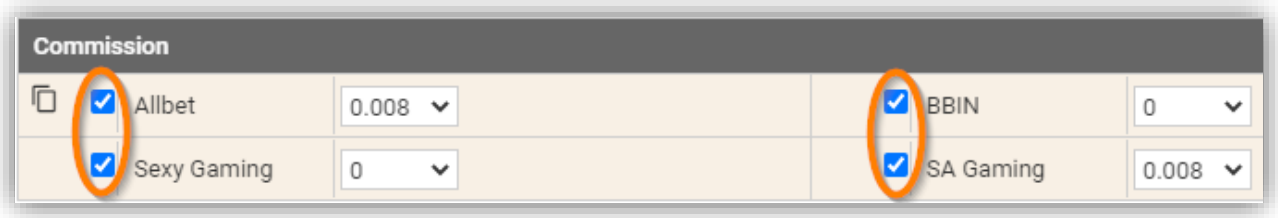

Step 3: Repeat *Step 6* from the instruction of Position Taking Settings to save your changes.

2.4. Commission Settings

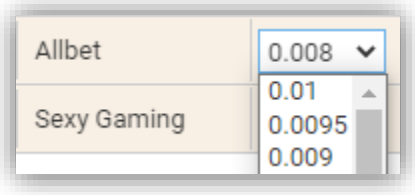

This section provides you with the instruction on how to perform partial updates on Commission Settings, with the use of **Copy Mode** to help you save time.

Step 1: Repeat *Step 1* through *Step 3* from the instruction of Position Taking Settings.

Step 2: In **Commission section**, select the products you want to update.

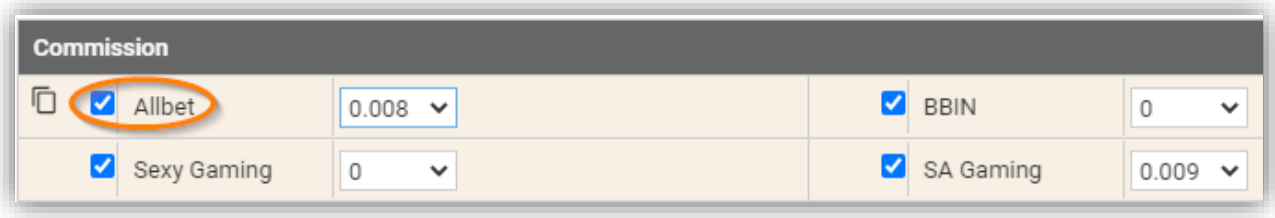

Step 3: From the **Commission** drop-down list, select commission values for each product.

– To save time, you can *copy the values* of the first product (on the top left) for the other products. *(Note: you can skip this step if you do not want to copy values.)*

– Before copying, make sure the first product on the left side is selected:

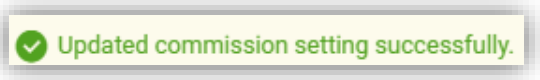

– Refer to *Step 2* from the instruction of Position Taking Settings (Copy Mode) to copy values.

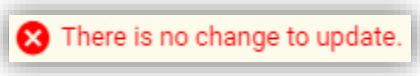

Step 4: On the top right corner of **Commission** section, click **Update** .

– When succeeded, you will see the following message:

– If you have not selected any product and click **Update** , you will see the following message:

(Note: any product that is selected will be updated regardless of whether its checkbox is enabled or not.)
